THREE CHEERS FOR HANDWRITING

This book has been created to help students develop and improve handwriting. It offers an alternative approach for those students who find handwriting difficult.

While formation of all small letters and some capital letters in this book adheres to the traditional method, formation of several of the capital letters has been modified. The purpose of the change presented here is to provide a simplification by eliminating some of the loops found on capital letters. While the inclusion of loops on these particular capital letters make those letters pleasing to the eye, they are not absolutely necessary to the recognition of the letter. For some students, it is the forming of these loops that increases the difficulty of cursive writing.

Another important feature of this book is that the presentation of practice pages is highly sequential. Only words formed from previously introduced letters are used for practice. Students are not expected to write words containing letters they have not first practiced individually.

Should more practice space be needed, a master page of writing lines has been included in this book.
