Name _____

Turn Up The Heat!

Some Eskimos live in igloos. An igloo is a house built from packed snow.

- The squares of ice are called **snow blocks**.
- The top block of the igloo is the **king block**.
- The very small opening in the side of the igloo is an **air hole**.
- The larger opening is an **ice window**.

Label the parts of the igloo.

How do you think the Eskimos stay warm in their igloos?

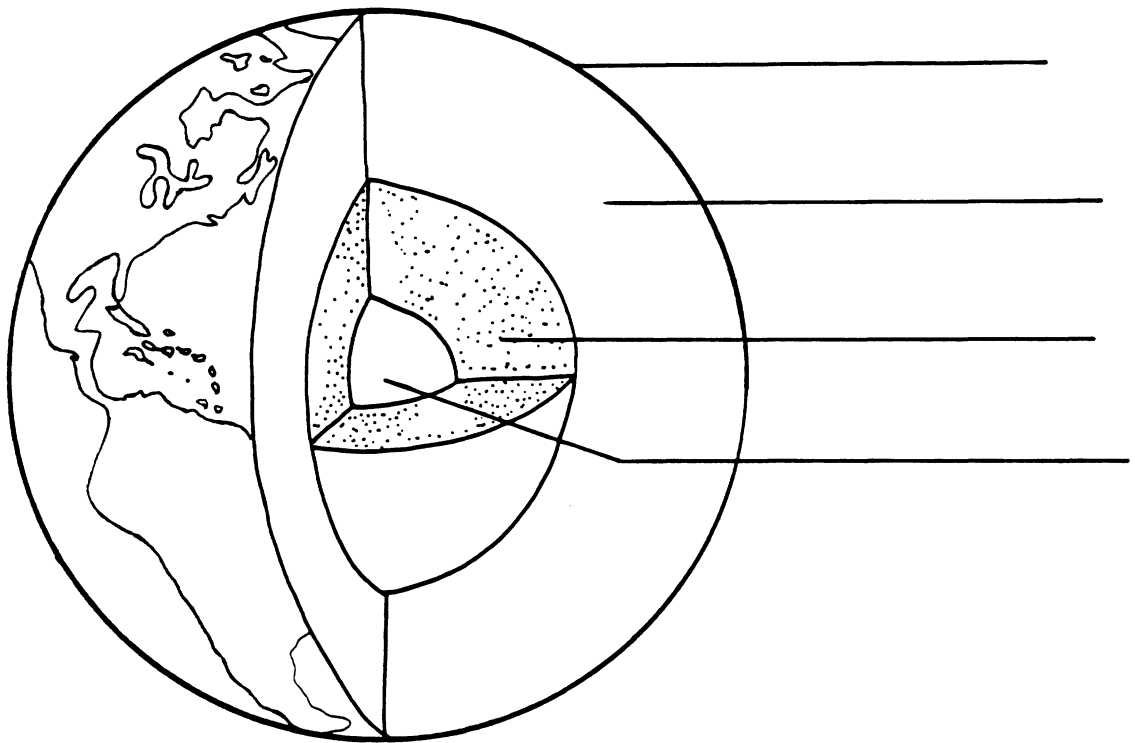

Name _____

Does It Have A Chewy Center?

If you could cut Earth in half, it would look a little like a Tootsie Pop. The layers of Earth have names.

- The outer layer of Earth is called the **crust**.
- The layer under the crust is the **mantle**.
- The center of Earth is the **inner core**.
- The **outer core** is the layer around the inner core.

Label the Earth's layers.

Do you think it is really possible to dig all the way to China? Why or why not?

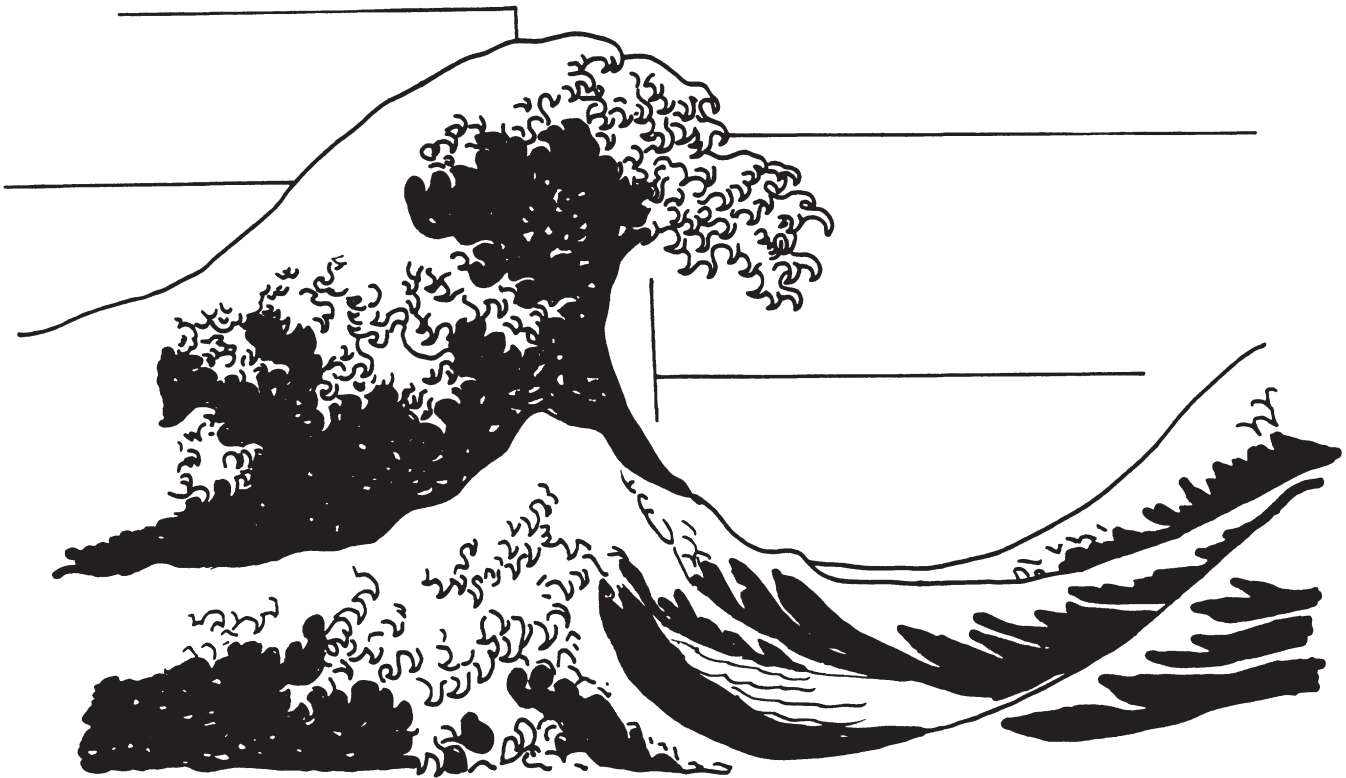

Name _____

Surf's Up!

Good surfers study waves. They know all about them before they go surfing. Now you will know, too.

- The very top of a wave is called the **crest**.
- The foamy part coming off the crest is called a **whitecap**.
- The part of the wave leading up to the crest is the **scend**. (sounds like "send")
- The curved part of the wave under the crest is the **curl** or **pipeline**.

Label the parts of the wave.

Why do you think surfers study the waves before going surfing?

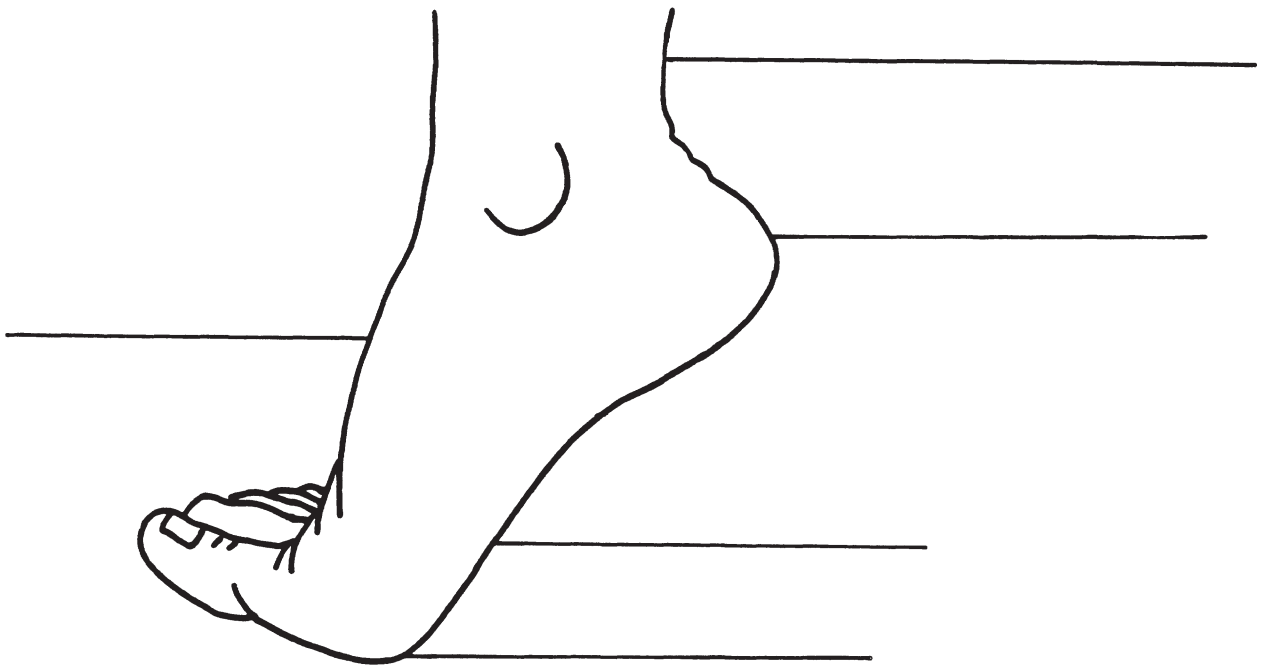

Name _____

Feet First

If you bump your big toe, you might say, "Ouch! I stubbed my toe!" But if you hurt another part of your foot, would you know what it is called?

- The part that connects the foot and leg is the **ankle**.
- The back part of your foot, under the ankle, is the **heel**.
- The lower part, behind your toes, is called the **ball** of your foot.
- The curved part of your sole is the **arch**.
- The top of your foot is the **instep**.

Label the parts of the foot.

Use an encyclopedia to find out how many bones are in your foot. _____
