

# Introduction

---

EASY Timed Math Drills — SUBTRACTION was developed especially for students who are having difficulty with basic math concepts. Students will gain confidence, speed, and accuracy as they progress through these step-by-step exercises. The drills start with whole page single subtrahend calculations and progress to calculations with two different subtrahends, then 3 different subtrahends, and finally to all-inclusive mixed subtrahend drills. Pages with number line activities offer extra help and practice.

Set an appropriate time limit for each drill based on your student's ability levels. The amount of time allocated can be adjusted as skill levels develop. A chart is included on which each student's progress can be recorded. To validate a student's achievement, we have also included an award certificate.
