INTRODUCTION

The focus of *Fifth-Grade Math Minutes* is math fluency—teaching students to solve problems effortlessly and rapidly. The problems in this book provide students with practice in key areas of fifth-grade math instruction, including

- two- and three-digit addition and subtraction
- multiplication
- division
- graphing
- rounding
- decimals
- measurement
- fractions
- percents
- angles
- perimeter, area, and volume

Use this comprehensive resource to improve your students' overall math fluency, which will promote greater self-confidence in their math skills as well as provide the everyday practice necessary to succeed in a testing situation.

Fifth-Grade Math Minutes features 100 “Minutes.” Each Minute consists of ten classroom-tested problems for students to complete in one minute. Each Minute includes questions of varying degrees of difficulty, integrating problem-solving and basic math skills. This unique format offers students an ongoing opportunity to improve their own fluency in a manageable, nonthreatening format. The quick, one-minute format combined with instant feedback makes this a challenging and motivational assignment students will look forward to each day. Students become active learners as they discover mathematical relationships and apply acquired understanding to the solution of realistic problems in each Minute.

HOW TO USE THIS BOOK

Fifth-Grade Math Minutes is designed to be implemented in numerical order. Students who need the most support will find the order of skills as introduced most helpful in building and retaining confidence and success. For example, the first time that students are asked to identify a geometric figure, possible answers are provided. Eventually, students are asked to name a geometric figure without the support of multiple-choice answers.

Fifth-Grade Math Minutes can be used in a variety of ways. Use one Minute a day for warm-up activities, bell-work, review, assessment, or a homework assignment. Keep in mind that students will get the most benefit from their daily Minute if they receive immediate feedback. If you assign the Minute as homework, correct it in class at the beginning of the day.

If you use the Minutes as a timed activity, place the paper facedown on the students' desks, or display it as a transparency. Use a clock or kitchen timer to measure one minute. Encourage students to concentrate on completing each problem successfully and not to dwell on problems they cannot complete. At the end of the minute, have students stop working. Then, read the answers from the answer key (pages 108–112), or display them on a transparency. Have students correct their own work and record their score on the Minute Journal reproducible (page 6). Then, have the class go over each problem together to discuss the solution(s). Spend more time on problems that were clearly challenging for most of the class. Tell students that difficult problems will appear on future Minutes and they will have other opportunities for success.

.....

Teach students strategies for improving their scores, especially if you time their work on each Minute. Tell students to

- leave more time-consuming problems for last
- come back to problems they are unsure of after they have completed all other problems
- make educated guesses when they encounter problems they are unfamiliar with
- rewrite word problems as number problems
- use mental math wherever possible

Students will learn to apply these strategies to other timed-test situations.

The Minutes are designed to improve math fluency and should not be included as part of a student's overall math grade. However, the Minutes provide an excellent opportunity for you to see which skills the class as a whole needs to practice or review. This knowledge will help you plan the content of future math lessons. A class that consistently has difficulty with reading graphs, for example, may make excellent use of your lesson in that area, especially if they know they will have other opportunities to achieve success in this area on future Minutes. Have students file their Math Journal and Minutes for that week in a location accessible to you both. Class discussions of the problems will help you identify which math skills to review. However, you may find it useful to review the Minutes on a weekly basis before sending them home with students at the end of the week.

While you will not include student Minute scores in your formal grading, you may wish to recognize improvements by awarding additional privileges or offering a reward if the entire class scores above a certain level for a week or more. Showing students that you recognize their efforts provides additional motivation to succeed!

MINUTE JOURNAL

NAME _____

MINUTE	DATE	SCORE	MINUTE	DATE	SCORE	MINUTE	DATE	SCORE	MINUTE	DATE	SCORE
1			26			51			76		
2			27			52			77

SCOPE AND SEQUENCE

SKILL

MINUTE IN WHICH SKILL FIRST APPEARS

Numbers to Hundred Thousands	1
Multiplication Facts	1
Number Sense/Place Value	1
Time	1
Divisibility Rules	1
Graphs/Tables	1
Standard Measurement	1
Fact Families (addition/subtraction)	2
Fractions	2
Geometric Figures (sides, faces, edges, vertices)	2
Patterns	2
Geometric Shapes (plane and solid figures)	3
Division Facts	3
Metric Measurement	4
Numbers to Hundred Billions	5
Addition (two and three digits)	5
Subtraction (two and three digits)	6
Prime and Composite Numbers	6
Properties of Addition	6
Dividing with Remainders	8
Rounding Whole Numbers	8
Expanded Notation	11
Column Addition	14
Properties of Multiplication	18
Parallel / Perpendicular	18
Money	18
Temperature	20
Subtraction (four digits or greater)	21
Addition (four digits or greater)	22
Rounding Decimals	23
Algebra (use of variables)	23
Fact Families (multiplication/division)	24
Comparing and Ordering Decimals	24
Symmetry	26
Congruent / Similar Figures	28
Adding / Subtracting Decimals	29
Perimeter	34
Angles	39
Multiplying Decimals	42
Finding Distance Traveled	49
Equivalent Fractions	50
Circles	50
Percent	56
Area	58
Fractions (add, subtract, mixed, reciprocals)	61
Ratio	67
Volume	68
Least Common Multiple / Multiples / Greatest Common Factor	69
Multiplying Fractions	69
Improper Fractions / Mixed Numbers	71
Positive and Negative Integers	72
Fractions (lowest terms)	72
Area of a Triangle	75
Graphing Coordinates	81

MINUTE 1

NAME _____

1. For 902,798, write the digit in the hundreds place. _____

2. $6 \times 2 =$ _____

3. Can 351 be evenly divided by 2? Circle: Yes or No

4. $80 \div 8 =$ _____

5. Write the time 3 hours after 9:00 p.m. _____

Use the circle graph to complete questions 6–8.

6. What percentage of people prefer baseball? _____

7. What two sports together equal the same percentage as baseball? _____ and _____

8. Which sport has the greatest percentage? _____

9. How many sides does a rectangle have? _____ sides

10. 1 foot = _____ inches

MINUTE 2

NAME _____

Use the pictograph to complete questions 1–3.

(Each  equals 5 books.)

1. How many books did Eva read? _____ books
2. How many more books did Eva read than Diana? _____ books
3. Two students read the minimum number of books. How many books did they each read? _____ books
4. $77 \div 7 =$ _____
5. How many sides does a pentagon have? _____ sides
6. Write the missing family fact.
 $6 + 8 = 14$
 $14 - 8 = 6$
 $14 - 6 = 8$

7. The value of the underlined digit in 326,619 is 3 hundred thousand. Circle: True or False
8. Write a fraction for the shaded part. _____ 
9. 1 minute = _____ seconds
10. 0, 3, 6, 9, _____, _____, _____
