#### Introduction

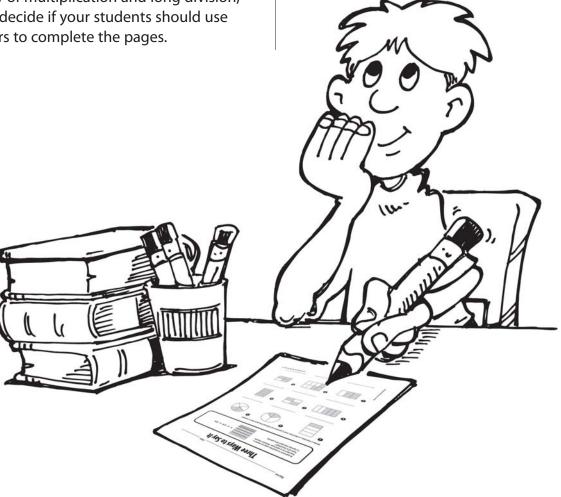

ercents 5–6 contains ready-to-use activity pages to provide students with skill practice. The fun activities can be used to supplement and enhance what you are already teaching in your classroom. Give an activity page to students as independent class work, or send the pages home as homework to reinforce skills taught in class. An answer key is included at the end of the book as a convenient reference.

This book provides activities that will directly assist students in practicing basic skills and concepts. The structure of the book enhances students' learning and enables them to meet new challenges with confidence. The activities in this book progress from simple to more difficult. Because calculating percents relies on a mastery of multiplication and long division, you may decide if your students should use calculators to complete the pages.

Students will receive reinforcement in the following skills:

- Identifying and naming percents
- Finding and ordering equivalent fractions, decimals, and percents
- Determining the percent of a number
- Finding a variable
- Using percents in real-world activities
- Solving equations involving percents

Use *Percents 5–6* to reinforce or extend concepts and skills. "Recharge" skill review with the ready-to-go activities in this book, and give students the power to succeed!

### Parts of a Whole

A percent is another way to name a fraction or a decimal. **Percent** means "out of a hundred." It names the part of a whole.

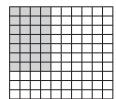

= 35%

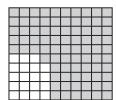

Write the percent that is shaded.

#### **Ratios and Percents**

To convert a ratio to a percent, the second term in the ratio must be 100.

Ratio: 4 out of 10

- 1. Multiply both numbers by ten = **40** out of **100**
- 2. Name the Percent = 40%

Ratio: 3 out of 5

**1.** Multiply both numbers by 20 =

**60** out of **100** 

2. Name the Percent = 60%

Write the percent.

1 50 out of 100	2 34 out of 100	3 98 out of 100
8 out of 100	<b>5</b> 29 out of 100	6 100 out of 100
4 out of 5	8 out of 25	9 49 out of 50
12 out of 20	18 out of 20	21 out of 25
<b>B</b> 8 out of 50	16 out of 100	16.5 out of 25
7 out of 10	1.5 out of 50	3.75 out of 20

## What's Missing?

Complete the chart with the missing ratio, fraction, and percent equivalents. Reduce fractions to lowest terms.

Ratio	Fraction	Percent
27 out of 100		
	16⁄ <sub>25</sub>	
48 out of 100		
		6%
		25%
35 out of 50		
		46%
	3/4	
3 out of 5		
		58%

#### **Decimals to Percents**

Convert a decimal to a percent by multiplying the decimal by 100.

$$0.5 \times 100 = 50\%$$

**Shortcut**: Move the decimal two spaces to the right.

### From Decimals to Percents or Back

Convert a decimal to a percent by multiplying the decimal by 100.

$$.25 \times 100 = 25\%$$

**Shortcut:** Move the decimal two spaces to the right.

Convert a percent to a decimal by dividing the percent by 100.

**Shortcut:** Change the % sign to a decimal and move the decimal two spaces to the left.

Change each decimal to a percent or each percent to a decimal.

### **Percents Greater Than One**

Convert a decimal to a percent by multiplying the decimal by 100.

 $1.0 \times 100 = 100\%$ 

**Shortcut:** Move the decimal two spaces to the right.

# One Way or Another

Convert a decimal to a percent by multiplying the decimal by 100.

$$1.25 \times 100 = 125\%$$

**Shortcut:** Move the decimal two spaces to the right.

Convert a percent to a decimal by dividing the percent by 100. 1.25

**Shortcut:** Change the % sign to a decimal and move the decimal two spaces to the left.

$$125\% = 125$$
.

Change each decimal to a percent or each percent to a decimal.
